

CONCEPT TEST 10

PART 1 (DUE WEDNESDAY)

Which of the following does describe the [ADODB.Connection] object? Justify your answer.

- a) It is set to create an ad-hoc connection to the MS Access database
- b) It uses the Jet.OLEDB data provider to connect to the MS Access database
- c) It outputs data to the HTML page
- d) It is used to extract data from ADOBE website to install on the host machine

For this week's concept test, I choose **a**).

It is verbatim from *Database systems: Design, implementation, & management* (Coronel & Morris, 2018, p. 714).
